ArmorThane is a multi-national company founded by Garry Froese, CEO, in 1989. We have facilities in the U.S. and Canada and export products and equipment to large dealers around the world.

We specialize in the development, manufacturing, and distribution of top-quality protective coatings, as well as the design and fabrication of commercial spraying equipment. Our products include pure and specially-formulated hybrid polyurea and polyurethane with spray and roll-on applications. We provide low and high-pressure equipment and supplies for both fixed locations and mobile coating trailers.

Our custom-built MOBILE COATINGS UNITS are designed to travel to any project site. Thousands of applications benefit from ArmorThane protective coatings. If you would like to know more about specific trailers, products and applications, just give us a call.

Let us design and outfit a coating trailer for your business. Call us at 800.227.2905.

Built to YOUR Project Specifications

Projects differ from one applicator to the next. So, why buy a trailer designed for someone else? Instead, we customize the trailer to fit your projects. Our Mobile Coatings Units (MCUs) take power and equipment to industrial, commercial or residential jobsites. Options vary from a smaller, low-pressure configuration to a longer, two-compartment version that’s fully outfitted with a high pressure system. Sizes typically range from 16’ up to 36’. You tell us what you need.

Set-Up Options

Projects come in all shapes and sizes. Once we understand your plans, we help design a one- or two-room trailer for efficiency and performance. Power options include diesel or gas generators, electric or gas air compressors, shore power or combinations. Line set selection can be up to 410 feet. Rough terrain or heavy loads may require higher ground clearance. We configure heating, cooling, storage, access and safety. Floors are sprayed with an ArmorThane coating for durability.

Bumper Pull Trailer Examples

Foam-Focused Unit – 20 Ft
This trailer was designed to run completely off the electricity from the generator. The 30kw diesel engine powered the ArmorThane proportioner, compressor and air dryer, as well as the trailer heat and lights.

Residential and Commercial – 20 Ft
This unit was built for a larger-scale residential and commercial coatings business. It was designed to spray a variety of projects such as decks, docks, water features, animal enclosures, larger utility trucks, municipal facilities and more.

Gooseneck Trailer Examples

Mining / Heavy Industry Unit – 30 Ft
This high-output unit was designed to be a mobile coatings workshop for a large mining complex. Spraying is done on many pieces of equipment and the larger compressor allows use of multiple air tools right from the trailer.

Primary / Secondary Containment – 36 Ft
This large, high-output trailer was built to stay onsite for operation by multiple crews. It runs on one fuel source and can spray continuously over large-area containment systems. Special features include resting berths and large capacity chemical storage.

Products, Equipment, Training

Our Mobile Coatings Units open the door for all types of projects. Therefore, we provide a wide range of ArmorThane pure and hybrid polymer products and equipment packages so applicators can spray anywhere protective coatings are needed. With the goal of performance quality, our technical staff trains applicators on the many aspects of a job from surface repair to preparation to spraying. All this with no franchise fees, no training cost and no minimums required.

Key Design Factors

All ArmorThane MCUs start with the same goals in mind… safety, environmental comfort, efficient / easy access, quality materials and cost effectiveness. Your projects are evaluated for conditions such as:

• Overall type / variety of spraying planned
• Spraying environment (temperature, humidity)
• Spraying distance from the trailer
• Tools and equipment required
• Access to power, cost of power
• Equipment noise, heat, ventilation
• Mobile or fixed locations

Learn more about the ArmorThane MCU.
